

Rhythm

Fabric Rhythm is a true boucle beauty. It's smooth yarns, soft touch and excellent performance are the perfect ingredients for our Timeless Collection. The timeless collection represents all our creative essentials. Fabrics that offer the very best value for money and suit every style all year round.

Inspired by premium, heavy and luxury fabrics, we created upholstery fabric Rhythm. The look and feel of Rhythm will amaze and convince you.

The heavy weight of 950 grammes per meter suits the high-quality impression of the fabric. The twisted polyester yarns are smooth and soft to the touch. The fabric is yarn dyed and woven on a dobby loom. For easy processing we have applied a light needle-punch coating.

All options for upholstery are suitable for this fabric. The tone-in-tone dyed yarns create a full and rich optic sense. The colours are chosen in subtle colour palette with a high-class vibe.

Due to the rough construction of Rhythm, we recommend a minimum seam allowance of 1 cm and kindly note that extra overlocking of the seam provides much more stability, especially with tight upholstered furniture.

For loose fitted upholstery models, please know that Rhythm is also machine-washable at 30 degrees Celsius*.

Get in the flow of our Rhythm.

- Always be careful with sharp or rough objects such as watches, buckles or Velcro, as they may damage the fabric.
- When a loop does occur, it can be easily pushed back into the fabric with a blunt object.
- Please note that through daily use a certain hairiness may occur, this can easily be taken away with a pilling machine and has no further influence on the durability of this textile.
- We recommend to wash the cover inside out and immediately place the cover back to the piece of furniture, slightly damp, after washing.

***Textafoam originals** Established in 1970, this Dutch family business brings together craftsmen in textiles and furniture design to build an unrivalled portfolio in upholstery fabrics that meets buyer's needs every time. Featuring a wide colour range, ultimate value for money and excellent reliability in the supply chain.*
