Feel the warm embrace of organic shapes and soft natural colours. Our fast moving society and busy schedules, evolve in the need to take a step back, unwind and get closer to nature. A wide variety of natural, beige and brown tones, rounded shapes, irregular patterns and bulky soft textures are characteristics for this theme. Natural isn't only a trend, it's also the awareness of our environment and it's vulnerability. We are more conscious about the sustainability of the choices we make. Textaafoam offers a wide range of commercially strong and inspiring upholstery fabrics in the Fabraa collection, for those who want to contribute to a sustainable world.
